Amblève project, Belgium 2025-2026

2000 trees planted

The restoration project in Amblève is continuing and can be expanded to a total of 100,000 trees. Following last season's interventions with 10,500 trees in 2023–2024 and 14,280 trees in 2024-2025, the same approach is being applied to strengthen forest resilience and diversity this season. The Amblève forest consists mainly of conifers, in particular spruce. At present, about 75% of the forest stands are spruce. Localized thinning helps prevent attacks on spruces that are weakened by competition for light. The objective is to gradually reduce the share of spruce to 50%. To achieve this, clear-cutting is avoided. Management is carried out through thinning and progressive canopy reduction, which irregularizes the stands and initiates assisted natural regeneration. Spruce requires a lot of light to grow well in its adult stage, which means little light reaches the forest floor. Natural regeneration is therefore limited, making external planting of young trees necessary. In the cleared patches, beech is planted. This species is well adapted to shaded conditions and is introduced at high density, as it tolerates competition well in its early years. This approach also protects the young trees against late frost and drought. In larger clearings, other species are introduced according to the conditions of each parcel. The long-term goal is to establish irregular stands with varied age classes, increasing resilience to unexpected events. The project takes place in a rural and agricultural region known for its extensive forest massifs and numerous trails, where hikers, riders and cyclists come to experience the rich nature around the Amblève river.

Care for communities

At Go Forest, we don't just plant trees. We engage in much more, such as ensuring sustainable support for local communities. We do so by using the UN Sustainable Development Goals, which serve as a blueprint for peace and prosperity for people and the planet, now and in the future. Depending on the region and the project, you'll be supporting different SDGs.
