## TE & LC's farm - Tamatave agroforestry project, Madagascar

 168 trees planted

On these farms in the East of Madagascar, multiple small agroforestry plantations were executed in collaboration with the local farmers and as part of the large Tamatave agroforestry project. With the funds collected in August 2024, we managed to plant 514 trees on the 0.4 hectare land in September 2024.

### Care for communities

At Go Forest, we don't just plant trees. We engage in much more, such as ensuring sustainable support for local communities. We do so by using the UN Sustainable Development Goals, which serve as a blueprint for peace and prosperity for people and the planet, now and in the future. Depending on the region and the project, you'll be supporting different SDGs.
