TE & LC's farm - Tamatave agroforestry project, Madagascar

 168 trees planted

On these farms in the East of Madagascar, multiple small agroforestry plantations were executed in collaboration with the local farmers and as part of the large Tamatave agroforestry project. With the funds collected in August 2024, we managed to plant 514 trees on the 0.4 hectare land in September 2024.

Mangrove plantation in Majunga, December 2025

 196 trees planted

In the Bombetoka Bay located in the North-West of Madagascar, more specifically in the village of Nosy Kabija (Belobaka municipality, Boeny), we've planted new mangrove trees on a site of 2.6 ha to restore the mangrove forest. In December 2025, 8892 mangrove trees of two species were planted here: *Ceriops tagal* and *Rhizophora mucronata*. The overall objective is to restore degraded lands and promote better management of the mangrove ecosystem to improve the living conditions of the local communities. Moreover, the mangroves provide spawning grounds for shrimps, crabs, and fish, which helps to boost the economy of the community.

Care for communities

At Go Forest, we don't just plant trees. We engage in much more, such as ensuring sustainable support for local communities. We do so by using the UN Sustainable Development Goals, which serve as a blueprint for peace and prosperity for people and the planet, now and in the future. Depending on the region and the project, you'll be supporting different SDGs.
