Baclain project, Belgium 2024-2025

 30 trees planted

The Baclain project, located in the Parc Naturel des Deux Ourthes (Gouvy, Belgium), focuses on the reforestation of a 2.5-hectare plot of fallow land previously used for coniferous plantations. The plot is surrounded by diverse-aged forests with mixed species and is very close to the Wez de Halleux stream. This rural area, rich in natural and agricultural landscapes, has soils conducive to forest growth, specifically loamy soils with favorable natural drainage. Scheduled for the season of 2024-2025, we introduce 7,650 new trees using a mixed planting approach. The species composition includes 34% Douglas fir, 33% larch, 20% beech, 10% oak, and 3% chestnut, with spacing tailored to each species' needs. Ground preparation will involve band tillage, with residual vegetation mulched and wildlife deterrents applied to protect young saplings. The regeneration of native species such as birch, sorb, and oak is anticipated, complementing the planted trees. This balanced approach will promote a resilient forest structure that aligns with regional biodiversity and climate goals. In general, the project aims to restore the land's ecological and economic value by reestablishing forest cover and enhancing ecosystem services such as water quality, flood mitigation, soil protection, and carbon sequestration. It transforms neglected land into a thriving forest ecosystem, contributing to local environmental, social, and economic benefits. Plantation update: - 7650 trees were planted in 2025: 2601 Douglas firs (34%), 2525 larches (33%), 1530 beeches (20%), 765 oaks (10%) and 229 chestnuts (3%). - Monitoring summary: The plantation took place on 2.5 hectares across several parcels in Gouvy. The terrain was prepared in advance and treated with natural forest latex. Douglas and larches were planted in mixed rows (2x1.7m), while beeches and oaks were placed along the borders (2x1.5m). - Maintenance: Clearing will be necessary due to the abundance of ferns.

Care for communities

At Go Forest, we don't just plant trees. We engage in much more, such as ensuring sustainable support for local communities. We do so by using the UN Sustainable Development Goals, which serve as a blueprint for peace and prosperity for people and the planet, now and in the future. Depending on the region and the project, you'll be supporting different SDGs.
